

# The Keeper

Our most affordable dispensing system. Preserves wine for weeks with nitrogen canister or argon cylinder. Also available in large format sizes. The system is expandable – just add additional stopper faucets. Now you can own the same system that restaurants use to adding harmless inert gas to barrels to displace oxygen, the same oxygen that causes wine to spoil.

We carry a full line of WineKeepers from a single bottle system up to 16 bottles. Please call with any questions on wine preservation.

## Standard Features includes:

- Disposable canister (good for 20 bottles)
- Deluxe regulator
- Stopper dispenser
- Tubing with quick-connect valve
- Simple instructions.

The Keeper - Nitrogen

## Nitrogen Canisters

Single-use nitrogen canisters for wine dispensing. Each will dispense approximately 18 liters (twenty to twenty four .75 liter bottles) there is a hazardous material fee of \$25 per shipment of up to 48 canisters.

## Argon cylinders

These compact cylinders provide faster pouring and will dispense approximately fifteen .75 liter bottles. Ships without hazardous material fee.

The Keeper - Argon
